Astrology Readings are more than just telling you when you will meet your love interest or get a promotion, astrology can help you figure out how to reach your goals.

Your astrological chart is unique to you. It is based on your birth time, birth date, and birthplace. It is really specific to you. No one else has your birth chart.

By looking at your birth information I use astrology to guide you. That guidance includes looking at your strengths and weaknesses. It also reveals information about your purpose and destiny.

I strongly believe that you need to know who you are first, before you can know where you're going. Through astrology I can help you understand yourself. That self-understanding solidifies your power to attain what you want.

Everyone is concerned about a set of basic things in their life. These include love, career, health, children, family, creativity, and friends. These things are the foundation of a fulfilling life. The way to attract these things into your life is found in your astrological chart.

That's where the predictive part of astrology comes in. When your journey becomes clear, then you can use future opportunities for your intentions. Rather than being subjected to future trends, you can gain some control over them. This puts you in the driver's seat of your own life. Your life becomes your greatest adventure.
